In these two entertaining and nostalgic specials, traveller Dean Cycon experiences how travel has changed over the past 50 years and celebrates a truly golden decade in travel. Be it on the open road or up in the air, advances in technology in the ’70s gave us opportunities to see the world as never before.

The Road of Freedom

Dean gallivants across the USA and Europe exploring the modes of travel that made the 1970s so uniquely entertaining. This decade was a time when luxury air travel was the paragon of stylish living and the family vacation became a rite of passage. While some young Americans drove across the country in their super-charged V8 muscle cars, others strapped on a rucksack to follow the Kerouacian dream of limitless horizons and freedom found whilst exploring the vastness of their country.

Up, Up and Away

We go travelling back in time with Dean to ride a Harley Davidson, a muscle car, dune buggy, family station wagon and VW Campervan. Dean hops on a 747 and takes part in the louche Pan-Am lounge experience that came with the birth of Boeing’s giant of the skies. Following that he inter-rails to Europe bedding down in a hostel armed with a dog-eared copy of the ’Let’s Go’ travel guide. In Amsterdam, he goes in search of the infamous Hippy trail to India, and back home he recounts the story of the Greyhound bus – the all American public carriage. Traveling in the ’70s is a fun-filled travelogue not to be missed.
